LIST OF CONTENTS

NUMBER 1

	i	Announcement
S. U. Mohandas, T. A. Phelps and **K. M. Ragsdell**	1	Structural optimization using a fuzzy goal programming approach
M. Abo-Elkhier	9	Analysis of pipe bends using pipe elbow element
R. S. Al-Mahaidi, A. R. H. Al-Khalil and **A. M. A. Ghalib**	17	Analysis of beams resting on nonlinear media by the stiffness method
R. Nakib and **D. M. Frangopol**	27	Reliability-based structural optimization using interactive graphics
A. Komarakul-na-nakorn and **J. S. Arora**	35	Stability criteria: a review
A. Kaveh	51	Algebraic graph theory for ordering
G. J. Turvey and **N. G. V. Der Avanessian**	55	Full-range response of clamped ring-stiffened circular steel plates—comparisons between experiment and theory
J. Singh and **V. P. Singh**	71	Dynamic response of buried orthotropic cylindrical shells to an inclined axisymmetric moving load
N. Kamiya and **E. Kita**	81	Boundary element method for quasi-harmonic differential equation with application to stress analysis and shape optimization of helical spring
J. C. Bruch, Jr, S. Adali, J. M. Sloss and **I. S. Sadek**	87	Optimal design and control of a cross-ply laminate for maximum frequency and minimum dynamic response
V. S. Bhattachar and **F. E. Weisgerber**	95	Dynamic analysis using a linearized failure surface
J. J. Rencis, T. J. Urekew, K.-Y. Jong, R. Kirk and **P. Federico**	103	*A posteriori* error estimation for the finite element and boundary element methods
	I	Software Survey Section

NUMBER 2

COMPUTATIONAL TECHNOLOGY FOR FLIGHT VEHICLES

A. K. Noor and S. L. Venneri: Preface v

Modeling of Local Phenomena and Edge Effects in Solids

M. M. Rashid and S. Nemat-Nasser: Modeling very large plastic flows at very large strain rates for large-scale computation 119

T. Belytschko and Y. Y. Lu: Global–local finite element–spectral–boundary element techniques for failure analysis 133

S. K. Mital, J. J. Caruso and C. C. Chamis: Metal matrix composites microfracture: computational simulation 141

S. K. Datta, A. H. Shah and W. Karunasena: Edge and layering effects in a multilayered composite plate 151

Stochastic Modeling and Simulation of Fracture Toughness

M. Ostoja-Starzewski: Bounds on constitutive response for a class of random material microstructures 163

M. Grigoriu and M. T. A. Saif: Fatigue analysis of cracked anisotropic plates subject to stochastic loads 169

L. Minnetyan, P. L. N. Murthy and C. C. Chamis: Composite structure global fracture toughness via computational simulation 175

Modeling, Partitioning Strategy, and New Finite Elements

M. S. Shephard, E. V. Korngold, R. R. Collar and P. L. Baehmann: A modeling framework for controlling structural idealizations in engineering design 181

A. L. González Blázquez: Mathematical modelling for analysis of nonlinear aircraft dynamics 193

C. Huerta, S. Gomez-Lera, V. Gómez-Molinero, J. Solá, J. Molina and E. Alarcón: Physical and mathematical modeling of wave propagation in the ARIANE 5 VEB structure 199

A. K. Noor, J. M. Peters and L. S. Chien: On the partitioning strategy based on symmetry transformations 207

J. Jirousek and A. Venkatesh: A new FE approach for adaptive reliability assurance 217

F. J. Mello, M. Borri and S. N. Atluri: Time finite element methods for large rotational dynamics of multibody systems 231

NUMBER 3

S. Vellaichamy, B. G. Prakash and **S. Brun**	241	Optimum design of cutouts in laminated composite structures
M. Ostwald	247	Optimum weight design of sandwich cylindrical shells under combined loads
Ö. Jonsson and **T. Larsson**	259	A note on step-size restrictions in approximation procedures for structural optimization
K.-H. Chang and **J. L. T. Santos**	265	Distributed design sensitivity computations on a network of computers
A. Y. T. Leung	277	Recurrent integration of beam functions
R. Gopalakrishnan, S. Vijayakar and **H. Busby**	283	An iterative algorithm for adaptive element splitting using transition elements
K. Y. Lam and **K. C. Hung**	295	Vibration study on plates with stiffened openings using orthogonal polynomials and partitioning method
K. Ramachandran	303	Best ordering for system bounds
D.-M. Ku and **L.-W. Chen**	309	Kineto-elastodynamic vibration analysis of robot manipulators by the finite element method
P. Wriggers, T. Vu Van and **E. Stein**	319	Finite element formulation of large deformation impact–contact problems with friction
B. Nageswara Rao and **G. Venkateswara Rao**	333	Stability of tapered cantilever columns subjected to a tip-concentrated follower force with or without damping
		Technical Notes
N. Rajasekhara Naidu, K. Kanaka Raju and **G. Venkateswara Rao**	343	Post-buckling of a square plate resting on an elastic foundation under biaxial compression
G. L. Slagerman and **N. Popplewell**	347	Redesign of a safety knee joint
V. Ramamurti, P. S. Arul Kumar and **K. Jayaraman**	353	Performance comparison of cast and fabricated gearbox casings
	I	Software Survey Section

NUMBER 4

J. Y. Ooi and **J. M. Rotter**	361	Wall pressures in squat steel silos from simple finite element analysis
J. B. Ransom and **N. F. Knight Jr**	375	Global/local stress analysis of composite panels
K. H. Ha	397	Finite element analysis of sandwich plates: an overview
H. R. Riggs	405	A substructure analogy for plasticity
Y. S. Feng and **B. F. Song**	413	Reliability analysis and design for multi-box structures
H. A. Hadid and **M. H. M. Bashir**	423	Analysis of orthotropic thin plate using spline-integral method
J. Chen, B. Dai and **H. Sun**	429	Reliability of reflector accuracy of parabolic antenna under the action of random wind load
M. C. Pal	435	Buckling load and deformations of a cylindrical shell under non-uniform belt tensions
E. Moncrieff and **B. H. V. Topping**	441	Computer methods for the generation of membrane cutting patterns
M. Bremicker, P. Y. Papalambros and **H. T. Loh**	451	Solution of mixed–discrete structural optimization problems with a new sequential linearization algorithm
H. Abramovich, T. Weller and **R. Yaffe**	463	Application of a modified Donnell technique for the determination of critical loads of imperfect plates
J. Vrbka and **Z. Knésl**	471	A mixed numerical–analytical approach to strength optimization of an axisymmetric compound vessel
R. C. Mahapatra and **S. P. Dasgupta**	481	Elasto-plastic modelling of plane geomechanics problems
G. Holmberg	503	A solution scheme for three-dimensional multi-body contact problems with friction using mathematical programming
N. Nakahira, K. Ozawa and **M. Naruoka**	515	Vibration of plane trusses by the Newmark method
H. N. Al-Ghamedy and **K. J. Willam**	521	Layered nonhomogeneous curved beam elements for inelastic analysis

K. K. Tamma and **R. R. Namburu**	535	A new unified explicit architecture of thermal/structural dynamic algorithms: applications to coupled thermoelasticity
Cheer Germ Go and **Yee Shown Lin**	547	Infinitely small element for the problem of stress singularity
F. Arbabi and **F. Li**	553	Macroelements for variable-section beams
R. J. Yang	561	Component shape optimization using BEM
A. S. Ezeldin and **P. N. Balaguru**	569	Characterization of bond between fiber concrete and reinforcing bars using nonlinear finite element analysis
Chen Qian and **Zhu Demao**	585	Vibrational analysis theory and application to elastic–viscoelastic composite structures
T. E. Wilt, A. F. Saleeb and **T. Y. Chang**	597	A mixed element for laminated plates and shells
		Technical Notes
Y. Arun Roy, B. P. Shastry and **G. Venkateswara Rao**	613	Stability of partially stiffened square plates using high precision finite elements
A. E. Anuta Jr	617	The modal equations in classical mechanics
G. H. Little	621	Large deflections of orthotropic plates: some extensions to the computer program 'ELDAROP'
	I	Software Survey Section

NUMBER 5

G. Cyrok and **R. Świtka**	625	On certain numerical problems in the analysis of plates and punches on an elastic half-space with unilateral constraints
J. A. Czyz and **W. Szyszkowski**	637	An effective method for non-linear viscoelastic structural analysis
M. A. Ajiz	647	Application of parallel data structures to the finite element solution of circular flat plates
G. D. Gute and **J. Padovan**	663	Hierarchical Poly Tree configurations for the solution of dynamically refined finite element models
E. M. Lui and **C.-Y. Zhang**	707	Nonlinear frame analysis by the pseudo load method
A. Y. T. Leung and **F. T. K. Au**	717	Spline finite elements for beam and plate

M. A. De Rosa and **C. Franciosi**	731	Plate bending analysis by the cell method: numerical comparisons with finite element methods
X. Lu, W. Zhong and **J. Lin**	737	Dynamic superelement substructure method in forced vibration analysis
S. Pellegrino and **T. Van Heerden**	743	Solution of equilibrium equations in the force method: a compact band scheme for underdetermined linear systems
W. Gutkowski, J. Bauer and **Z. Iwanow**	753	Explicit formulation of Kuhn–Tucker necessary conditions in structural optimization
F. Giambanco, L. Palizzolo and **T. Panzeca**	759	The indirect force method
J. Rakowski	769	The interpretation of the shear locking in beam elements
K.-O. Kim	777	Improved calculations of modal design sensitivities
A. V. Saetta and **R. V. Vitaliani**	781	A finite element formulation for shells of arbitrary geometry
D. B. McCallen and **K. M. Romstad**	795	A continuum model for lattice structures with geometric and material nonlinearities
M.-J. Huang, J.-P. Yeh and **H.-J. Shaw**	823	Problem of conjugate conduction and convection between finitely vertical plates heated from below
Y. Feng and **K. Ni**	833	System reliability of a rotating shaft of an aircraft tailplane
D. Johnson	837	The bending of curvilinear plates by the finite difference method
V. Chomkwah and **X. J. R. Avula**	845	A high-order theory for laminated composite plates using Lagrange multiplier technique
S. E. El-Metwally, A. M. El-Shahhat and **W. F. Chen**	863	3-D nonlinear analysis of R/C slender columns
		Technical Note
K. H. Ha	873	C language for finite element programming
		Announcement
	881	Computational Structures Technology, Department of Civil Engineering, Heriot-Watt University, Edinburgh, U.K. 20–22 August 1991
	I	Software Survey Section

NUMBER 6

S. A. Guralnick, T. Erber, J. He and **O. Soudan**	883	A computational strategy to determine the incremental collapse envelope for framed structures
T. D. Hien and **M. Kleiber**	893	Finite element analysis based on stochastic Hamilton variational principle
N. F. Grace, D. K. Bagchi and **J. B. Kennedy**	903	Cost optimization of structures with low permissible vibration level
Lei Xiao-yan, Huang Mao-Kuang and **Wang Xiuxi**	911	Geometrically nonlinear analysis of a Reissner type plate by the boundary element method
Y.-C. Yeh and **D.-S. Hsu**	917	Structural optimization with fuzzy parameters
J.-S. Chang	925	FEM analysis of buckling and thermal buckling of antisymmetric angle-ply laminates according to transverse shear and normal deformable high order displacement theory
S. A. El-Hammasi	947	Numerical method for analysing open thin-walled structures under interaction of bending and torsion
O. P. Agrawal and **S. L. Chung**	957	A superelement model based on Lagrangian co-ordinates for multibody system dynamics
C.-Y. Wang and **C. H. Yew**	967	Impact damage in composite laminates
V. Omprakash and **V. Ramamurti**	983	Spectral analysis of the transient characteristics of a bladed disk during run-up
Zhong Wan-xie and **Zhong Xiang-Xiang**	993	Computational structural mechanics. Optimal control and semi-analytical method for PDE
T. Vassilev	1005	Stability of a frame with redundant normal force distribution
K. S. Surana and **S. H. Nguyen**	1013	p-Version hierarchical two dimensional curved beam element for elastostatics
Y. J. Lee and **B. C. Lee**	1031	A new mixed functional proposed for the analysis of linear elastic problems
B. Štok and **A. Kranjec**	1037	Modelling of a rolling contact problem with the visco-elastic material response included
Z. Chen and **H. L. Schreyer**	1043	A numerical solution scheme for softening problems involving total strain control
J. P. H. Webber and **S. K. Morton**	1051	An expert system for laminated plate design using composite materials

S. F. Ng, M. S. Cheung and T. Xu 1069 A combined boundary element and finite element solution of slab and slab-on-girder bridges

I. Lee and J. J. Lee 1077 Vibration analysis of composite plate wing

J. C. J. Schellekens and R. de Borst 1087 The use of the Hoffman yield criterion in finite element analysis of anisotropic composites

D. Briassoulis 1097 Thin element applications of a new formulation for C^0 structural elements

D. V. Griffiths and P. A. Lane 1105 Finite element analysis of the shear vane test

1117 Corrigendum
